The goals of the program are:

- Provide individuals and their family with information about seizures, seizure first aid and epilepsy
- Provide individuals and their family with a network of support services to help everyone in the family to live well with a diagnosis of epilepsy
- Reduce the burden of epilepsy on the family, the health care team and the Ontario economy.

The Four Components of the Clinic to Community Program

1) Individualized appointments with a Clinic To Community Educator who is specially trained to support individuals and families living with epilepsy.

The Clinic To Community Educator will provide an overview of seizures, epilepsy, risk management including SUDEP and seizure first aid to the entire family.

2) Instructions on how to use a seizure log to document lifestyle, medication compliance and seizure activity.

3) A network of services including support groups, peer to peer linkages, recreation programs, and school and workplace assistance.

4) A series of information sheets filled with strategies to help the person with epilepsy to best manage their condition.

⚙️ The program is currently offered to individuals and families who live in the Southwest and Erie St. Clair LHIN.

List of Strategy Sheets

How to help my family cope with the unpredictability of the next seizure

- Seizure Log
- Planning for your Health Care Appointment
- SUDEP
- Types of Seizures

How to help my child succeed in school

- Student Support Program
- Epilepsy and ADHD
- Learning Challenges
