

Recommended Pathway for EMU and Epilepsy Surgery Referrals

The referral pathway below has been endorsed by the Epilepsy Implementation Task Force (EITF) and Provincial Neurosurgery Advisory Committee (PNAC). The referral pathway provides referring physicians a recommended centre of referral for epilepsy evaluation and surgery. The recommendations are not intended to supersede pre-existing referral relationships between physicians. The pathway was developed to support timely access to epilepsy care close to home. Referring practitioners are encouraged to check with District Epilepsy Centres for average wait time to first consultation with an epileptologist when making a referral.
